

Why keeping your Browser up-to-date is Top Priority!

At Horizon, keeping your data and personal information secure is our top priority. This means that we continue to take measures to provide you with the highest security when using the services we offer, such as online banking and bill pay. In order for us to continue to do our part we need to be ensured you are doing your part when it comes to accessing your account information online and keeping your computer safe from online threats.

Here are the top 3 reasons to keep your browser up-to-date:

#1 Stay safe and secure

If your web browser version is out-of-date it contains security vulnerabilities, which can put you at risk having your computer compromised by criminals. Depending on the security threat, your personal information (including emails, banking details, online sales, photos and other sensitive information) could be stolen or destroyed. This is not a hypothetical occurrence; it happens regularly and in large volumes.

There are many different sorts of security threats that you can be subject to when you're browsing the web; identity theft, phishing sites, viruses, Trojans, spyware, adware, and other sorts of malware. Many browser updates will be issued to combat these problems. Even a minor update can make a considerable difference to all sorts of factors of your browser experience.

#2 Access your online accounts using Online Banking and Bill Pay

We want to be sure you and your data are always protected. If you are using an outdated browser, your computer is vulnerable and you may start to see messages to update your browser. There will be a point Horizon's online banking and bill pay system will not allow you access until you update your browser.

#3 Get the best web experience

Another reason to keep your browser up-to-date is that you won't necessarily be getting the best browsing experience otherwise. You won't always know when you see a web page that isn't displaying properly. Most web sites will support older browser versions for a little while so that you don't suffer unnecessarily with an old browser, but for the most up-to-date functions, features and protection, you will need to update your browser regularly.
